
SOX 404 ITGC USER ACCESS REVIEW SUMMARY

Target System: ERP Production Database (NetSuite / SAP)
Audit Period: Q3 2026 (July 1, 2026 – September 30, 2026)
Control Owner: Andrew Maranan, Lead Access Governance Analyst
Review Date: September 30, 2026

TESTING METRICS SUMMARY*

Total Accounts Audited:	6
Valid Active Accounts:	2
Privileged Access Accounts:	1
Terminated Users Flagged:	2
Orphan Accounts Identified:	1
Total Revocation Tickets Raised:	3

AUDIT FINDINGS AND REMEDIATION MEMO

Control Objective:

Ensure user access to financial systems is revoked within 24 hours of employee departure and aligned with least-privilege principles.

Findings:

1. Two terminated employees (EMP-103, EMP-105) retained active system access post-departure. Helpdesk tickets IT-8821 and IT-8822 were issued to immediately disable credentials.
2. One orphan account (EMP-999 / vendor_temp) lacked a valid HR mapping. Account was disabled pending vendor contract re-validation (Ticket IT-8823).

Management Conclusion:

Control Operating Effectively with Remediation in Progress.

CONTROL OWNER SIGN-OFF
